A Consumer's Dictionary of Food Additives, by Ruth Winter

Definition. Consumer is a category that belongs within the food chain of an ecosystem. It refers predominantly to animals. Consumers are unable to make their own energy, and instead rely on the consumption and digestion of producers or other consumers, or both, to survive.

Consumer - Definition and Examples | Biology Dictionary

Consumers definition, a person or thing that consumes. See more.

Consumers | Definition of Consumers at Dictionary.com

Levels of the food chain. Within an ecological food chain, Consumers are categorized into primary consumers, secondary consumers, tertiary consumers. Primary consumers are herbivores, feeding on plants. Caterpillars, insects, grasshoppers, termites and hummingbirds are all examples of primary consumers because they only eat autotrophs (plants).

Consumer (food chain) - Wikipedia

Parts of the Food Chain (Producers/Consumers...) Producers. Plants are called producers. This is because they produce their own food! They do this by using light energy from the Sun, carbon dioxide from the air and water from the soil to produce food - in the form of glucose/sugar. The process is called photosynthesis. Click on the image below to learn about photosynthesis.

Producer Consumers - Food Chain - Kid's Corner

A heterotrophic organism that feeds on other organisms in a food chain. ♦ Herbivores that feed on green plants and detritivores that feed on decaying matter are called primary consumers. Carnivores that feed on herbivores or detritivores are called secondary consumers, while those that feed on other carnivores are called tertiary consumers.

Consumer | Definition of Consumer at Dictionary.com

Definition noun, plural: consumers An organism that generally obtains food by feeding on other organisms or organic matter due to lack of the ability to manufacture own food from inorganic sources; a heterotroph Supplement Consumer pertains to any of the organisms in most trophic levels in a food chain, except for producers and decomposers.

Consumer Definition and Examples - Biology Online Dictionary

consumer: [noun] one that consumes: such as. one that utilizes economic goods. an organism requiring complex organic compounds for food which it obtains by preying on other organisms or by eating particles of organic matter — compare producer 3.

Consumer | Definition of Consumer by Merriam-Webster

It's becoming more and more difficult to tell the difference with the cosmetic companies combining the three.

A Consumer's Dictionary of Cosmetic Ingredients, 7th ...

Secondary Consumer Definition. Secondary consumers are organisms that eat primary consumers for energy. Primary consumers are always herbivores, or organisms that only eat autotrophic plants. However, secondary consumers can either be carnivores or omnivores. Carnivores only eat other animals, and omnivores eat both plant and animal matter.

Secondary Consumer - Definition and Examples | Biology ...

Consumer vs. Customer. We often use the terms 'consumers' and 'customers' interchangeably. However, they do not always have the same meaning. A customer is not always the consumer. Customers purchase things, but consumers use them. For example, the customers of a company that sells pet food are mostly adults.

Consumers - definition and meaning - Market Business News

A consumer is a person or organization that uses or consumes economic services or commodities. Economics and marketing. A consumer is one that buys good for consumption and not for resale or commercial purpose. The consumer is an individual who pays some amount of money for the thing required to consume goods and services.
