## **Section 1 Reinforcement Worksheets - Lesson Worksheets**

Remember that reinforcement, even when it is negative, always increases a behavior. In contrast, punishment always decreases a behavior. In positive punishment, you add an undesirable stimulus to decrease a behavior. An example of positive punishment is scolding a student to get the student to stop texting in class.

## **Reinforcement and Punishment | Introduction to Psychology**

Answer and Explanation: Positive reinforcement is the strengthening of behavior through the use of a reward system. A pleasant stimulus is given directly after a desired behavior, and an individual begins to associate the behavior with the pleasant stimulus. This leads to the increased occurrence of the behavior.
